

Economy Tubular Arms Dust Shield Modification Instructions

When using the economy lower tubular arm, you must eliminate or modify the disc brake dust shield. Slight trimming is needed on the dust shield to clear the lower ball joint cup. Follow the instructions below to modify the dust shields.

Photo 1: Shows the area that needs to be modified.

Photo 3: Shows a complete left and right set of dust shields modified to clear the lower arms.

Photo 2: Shows drivers side dust shield. The one on the right has been modified to clear the lower arm.

Photo 4: Shows dust shield installed.
