FRONT PANARD ROD

Though designed for use with TCI frames and suspension parts, the front panard rod can be adapted to most any chassis using a 4-link, transverse spring and a beam or tube axle.

A Bolt axle mounting bracket to inside of passenger side 4-Link batwing with bar mount at bottom.

B Using assembled bar as a guide, position frame bracket (with open side towards engine) on bottom of drivers side frame rail just behind the front crossmember. Make sure that panard bar runs parallel to axle and then weld frame bracket in place.

All welding should be done by a qualified welder
